careers@seacastleinc.com

Work Location: Princeton, NJ

Reports To: Manager, Software Development

Description

A senior Developer / Business Analyst (7+ years) is needed for rapid application development in a C#.NET/Visual C++ (VC++) and Oracle PL/SQL environment. Business domain is asset management in the transportation industry. Supply chain, Logistics and Billing experience is also applicable. Experience with a rapid development methodology preferred.

This position gathers requirements, analyzes, designs, and develops solutions in the prescribed software architectural framework in conformance with project standards and industry best practices. Must be focused and work well with aggressive development targets.

- Works with business group to gather requirements
- Designs and prototypes UI
- Provides and participates in user walk-throughs
- Implements design elements in conformance with established standards
- Unit tests
- Analyzes runtime behavior
- Develops installation artifacts

Responsibilities

- Document business requirements according to established department standards using requirements documents and impact scenarios.
- Develops and modifies front-end code (implemented in C#.NET/Visual C++).
- Develops and modifies backend server code (implemented in C#.NET/Visual C++).
- Develops and modifies database code (implemented in Oracle PL/SQL).
- Interacts with IT management regarding work assignments and status
- Interacts with other team members regarding intersecting areas of the system.
- Participate in the system testing and deployment processes (all components).
- Coordinates with the efforts of others on the team for the specific module.
- Conducts unit testing on the software components for this module.
- Assist in production support and trouble shooting.

Requirements

Team-Oriented, Detail-Oriented Individual, Effective Communicator (both written and verbal)
Experience in the Intermodal Transportation Industry, Supply Chain or Logistics.
Require experience with client/server based application development.

Require technical development experience with:

- C#.NET
